## Letter of Recommendation

To whom it may concern:

Please accept my recommendation of Yash Nagar.

Yash Nagar has been a visiting student with the Wikidata team at Wikimedia Deutschland in September and October 2016. He worked on his master thesis about harvesting mathematical formula from Wikipedia, integrating them into Wikidata and making them available to a question answering system. This helped us enrich Wikidata's data significantly and make it more useful for our users.

Wikidata is Wikimedia's knowledge base. It makes general purpose open data about the world available to Wikimedia projects like Wikipedia as well as anyone else who wants to make use of it. It is maintained by 16000 volunteers and the 3rd largest Wikimedia project.

Wikimedia Deutschland – Gesellschaft zur Förderung Freien Wissens e. V. is a non-profit organisation based in Berlin, Germany. With more than 80 employees and 35.000 members, it is the oldest and largest of more than 40 independent chapters of the international Wikimedia movement. The most well-known Wikimedia project, the free online encyclopedia Wikipedia, is used by millions of people across the world every day and is continuously updated and improved by millions of users.
